

SHREE BRASS

Industries

Manufacturer of all kind of Brass Products as per Drawing and Samples

We Stand Behind Our Products

About Us

We Shree Brass Industries, have large manufacturing unit which is having a large number of automatic and semi-automatic machines, installed to manufacture a diverse and difficult range of products. The production cycle includes casting, machining, polishing, acquiring and packing. We are boasting of a production capacity per year. Our infrastructure is focused on world class quality and accuracy to provide maximum customer satisfaction.

Why US ?

- > Various Range of Brass Products
- > Professional and Trained Team
- > Updated Testing Facilities
- > Modern Infrastructural Unit

Our Strength

Molecular Research

Dedicated Team

Updated Standards

Quality Assurance

Ontime Delivery

OUR PRODUCTS

Aluminium Part

Brass Anchors

OUR PRODUCTS

Brass Cable Gland

Brass CNC Turning Parts

OUR PRODUCTS

Brass Earthing Parts

Brass Electrical Wiring

OUR PRODUCTS

Brass Electronic Parts

Brass Energy Meter Parts

OUR PRODUCTS

Brass File Screw

Brass Forging Parts

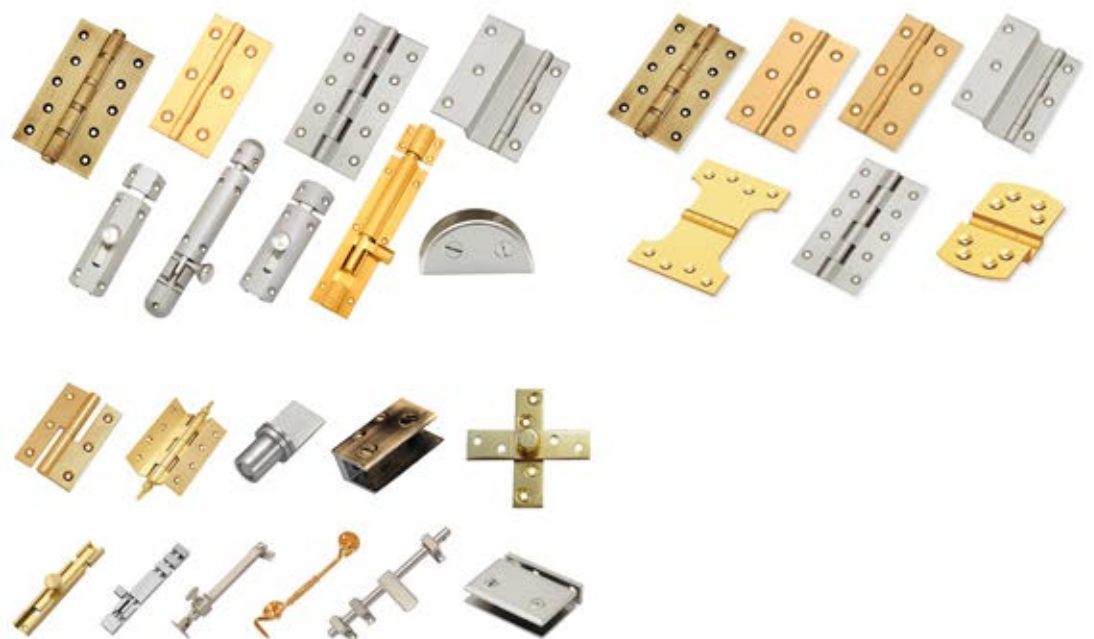

OUR PRODUCTS

Brass Gas Parts

Brass Hardware Parts

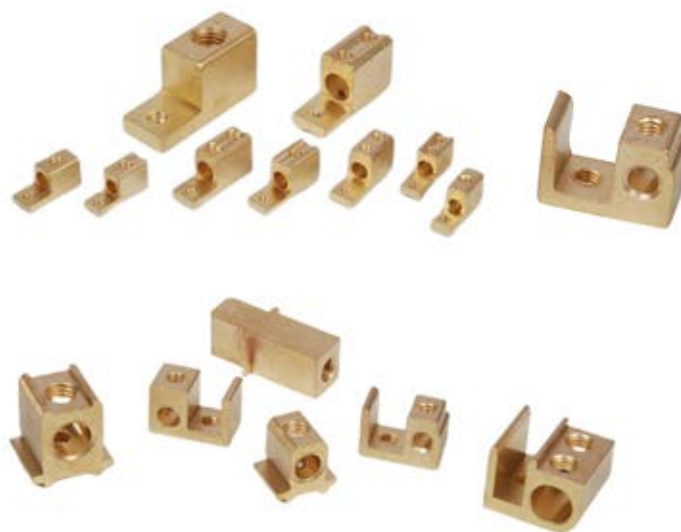

OUR PRODUCTS

Brass Hose Nipple

Brass HRC Fuse Contact

OUR PRODUCTS

Brass Inserts

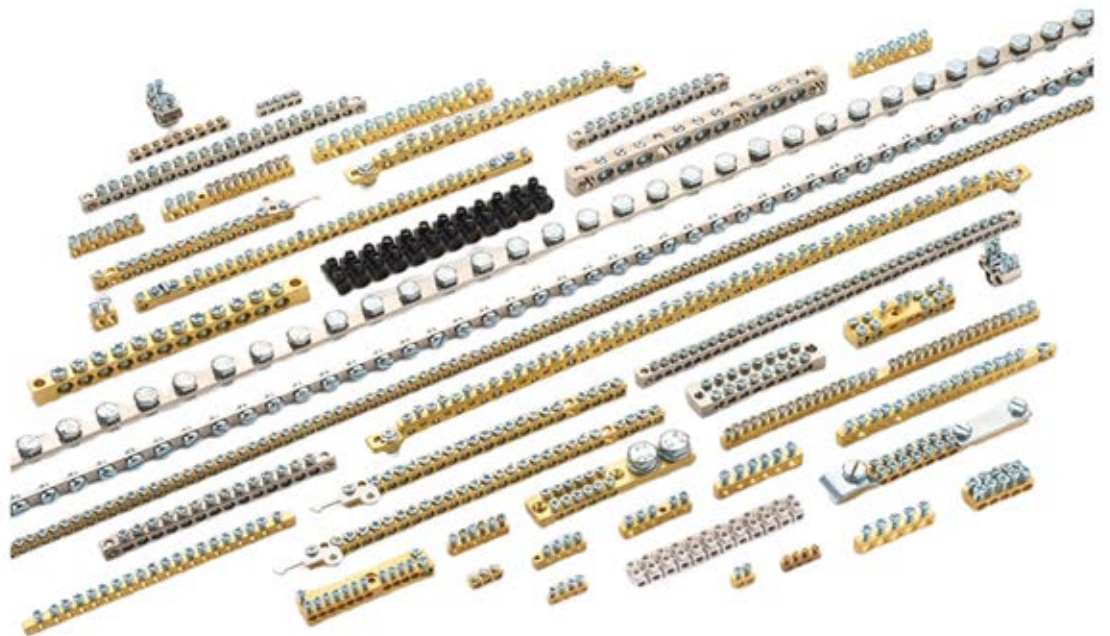

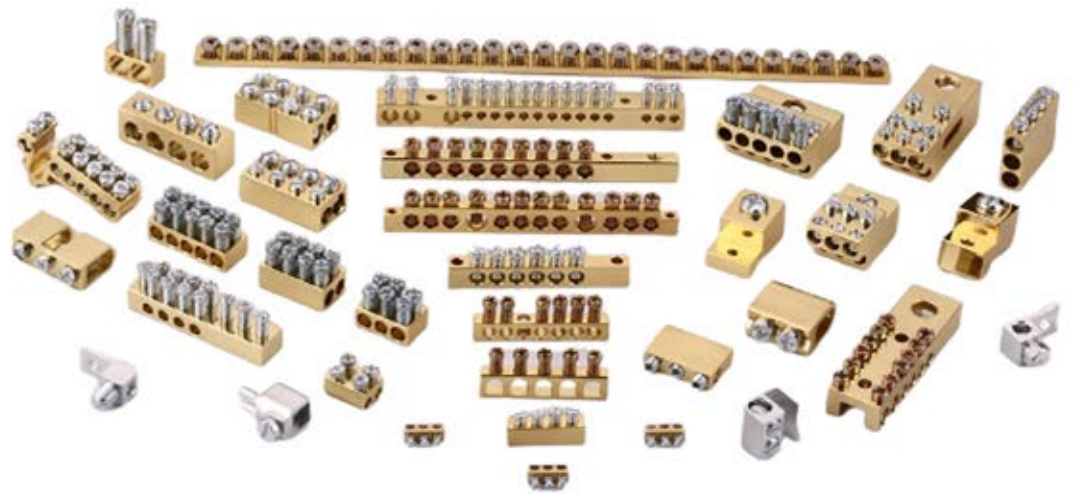

Brass Male Female Parts

OUR PRODUCTS

Brass Neutral Links

OUR PRODUCTS

Brass Nuts & Bolts

Brass PCB Terminals

Brass Plug Pin & Sockets

OUR PRODUCTS

Brass Precision Components

Brass Sanitary Parts

OUR PRODUCTS

Brass Sheet Metal Parts

OUR PRODUCTS

Brass Spacers

Brass Strip Connector

Brass Terminal Blocks

OUR PRODUCTS

Brass Threaded Inserts

Brass Washers

And Many More...

SHREE BRASS INDUSTRIES

PRECISION BRASS & METAL COMPONENTS

PRODUCT DETAILS

Custom components manufactured as per drawing and sample requirements

Brass Precision Components

- CNC turning components for precision applications
- Brass male and female threaded parts
- Nuts, bolts, washers, inserts and spacers
- Brass anchors, hardware and special components

Key Product Features

- Made to customer drawing, sample or specified dimensions
- Suitable for standard and customized component requirements
- Focus on dimensional accuracy, finish and repeatability
- Product range can be developed for OEM and industrial requirements

SHREE BRASS INDUSTRIES

PRECISION BRASS & METAL COMPONENTS

FORGING & MACHINED PARTS

Forged, precision-machined and application-specific brass components

Brass Forging Parts

- Forged brass parts for robust industrial applications
- Near-net-shape parts followed by machining where required
- Suitable for customized shapes and customer drawings

CNC & Precision Components

- CNC turning parts with required profiles and threads
- Precision components for engineering and OEM applications
- Male/female parts, sleeves, bushes, pins and special profiles

Gas, Hardware & Sanitary Parts

- Brass gas parts and fittings
- Hardware components and inserts
- Sanitary parts and plumbing-related brass components

SHREE BRASS INDUSTRIES

PRECISION BRASS & METAL COMPONENTS

ELECTRICAL & ELECTRONIC COMPONENTS

Components for electrical, electronic and metering applications

Electrical Wiring & Energy Meter Parts

- Brass electrical wiring components
- Energy meter parts and related precision components
- Customized sizes and profiles as per requirement

PCB Terminals & Terminal Blocks

- PCB terminals and connector components
- Terminal blocks and strip connectors
- Pins, sockets and contact components

HRC Fuse Contacts & Precision Contacts

- Brass HRC fuse contact components
- Contact parts for electrical assemblies
- Designed around required dimensions and application

Product dimensions, material and finish can be finalized against customer drawing/sample.

SHREE BRASS INDUSTRIES

PRECISION BRASS & METAL COMPONENTS

PRODUCT RANGE & SUPPLY

A broad range of brass components for industrial and OEM requirements

Core Range

- Brass spacers and strip connectors
- Brass washers and inserts
- Brass hose nipples and connectors
- Brass female/male parts
- Brass nuts, bolts and hardware

Application Range

- Brass precision components
- Brass electrical components
- Brass sanitary components
- Brass gas parts
- Aluminium parts

CUSTOM MANUFACTURING

Manufacturer of brass products as per drawing and samples

Quality • Accuracy • On-time Delivery

24 INCH SORF FLANGE

24 inch, SA-182 F316, ASME B16.5, Class 150 RF/SORF

Product Description

Slip-On Raised Face flange for large-diameter industrial piping connections.

Technical Details

- Size: 24 inch
- Material: SA-182 F316
- Standard: ASME B16.5
- Pressure Class: 150
- Facing: RF / SORF

APPLICATION

Industrial piping • Process systems • Chemical & petrochemical service • General engineering applications

Note: Product images are representative catalog-style visuals. Final dimensions, tolerances, inspection and certification are as per the purchase specification and applicable standards.

20 INCH SORF FLANGE

20 inch, SA-182 F316, ASME B16.5, Class 150 RF/SORF

Product Description

Slip-On Raised Face flange for large-diameter industrial piping connections.

Technical Details

- Size: 20 inch
- Material: SA-182 F316
- Standard: ASME B16.5
- Pressure Class: 150
- Facing: RF / SORF

APPLICATION

Industrial piping • Process systems • Chemical & petrochemical service • General engineering applications

Note: Product images are representative catalog-style visuals. Final dimensions, tolerances, inspection and certification are as per the purchase specification and applicable standards.

24 INCH BLIND FLANGE

24 inch, SA-182 F316, ASME B16.5, Class 150, Blind Flange

Product Description

Solid blind flange for closing and isolating a piping line or equipment connection.

Technical Details

- Size: 24 inch
- Material: SA-182 F316
- Standard: ASME B16.5
- Pressure Class: 150
- Type: Blind Flange

APPLICATION

Industrial piping • Process systems • Chemical & petrochemical service • General engineering applications

Note: Product images are representative catalog-style visuals. Final dimensions, tolerances, inspection and certification are as per the purchase specification and applicable standards.

20 INCH BLIND FLANGE

20 inch, SA-182 F316, ASME B16.5, Class 150, Blind Flange

Product Description

Solid blind flange for closing and isolating a piping line or equipment connection.

Technical Details

- Size: 20 inch
- Material: SA-182 F316
- Standard: ASME B16.5
- Pressure Class: 150
- Type: Blind Flange

APPLICATION

Industrial piping • Process systems • Chemical & petrochemical service • General engineering applications

Note: Product images are representative catalog-style visuals. Final dimensions, tolerances, inspection and certification are as per the purchase specification and applicable standards.

1/2 INCH SS 316 PIPE

Pipe SA-312 TP316, 1/2", Sch 80S, 6m

Product Description

Austenitic stainless-steel pipe supplied in the specified schedule and 6 m length.

Technical Details

- Size: 1/2 inch
- Material: SA-312 TP316
- Schedule: 80S
- Length: 6 m
- Product: Stainless Steel Pipe

APPLICATION

Industrial piping • Process systems • Chemical & petrochemical service • General engineering applications

Note: Product images are representative catalog-style visuals. Final dimensions, tolerances, inspection and certification are as per the purchase specification and applicable standards.

1/2 INCH SORF FLANGE

1/2 inch SA-182 F316, ASME B16.5, Class 150 SORF

Product Description

Compact Slip-On Raised Face flange for smaller-bore piping connections.

Technical Details

- Size: 1/2 inch
- Material: SA-182 F316
- Standard: ASME B16.5
- Pressure Class: 150
- Type: SORF

APPLICATION

Industrial piping • Process systems • Chemical & petrochemical service • General engineering applications

Note: Product images are representative catalog-style visuals. Final dimensions, tolerances, inspection and certification are as per the purchase specification and applicable standards.

1 INCH SS 316 PIPE

Pipe SA-312 TP316, 1", Sch 80S, 6m

Product Description

Austenitic stainless-steel pipe supplied in the specified schedule and 6 m length.

Technical Details

- Size: 1 inch
- Material: SA-312 TP316
- Schedule: 80S
- Length: 6 m
- Product: Stainless Steel Pipe

APPLICATION

Industrial piping • Process systems • Chemical & petrochemical service • General engineering applications

Note: Product images are representative catalog-style visuals. Final dimensions, tolerances, inspection and certification are as per the purchase specification and applicable standards.

1 INCH SORF FLANGE

1 inch SA-182 F316, ASME B16.5, Class 150 SORF

Product Description

Slip-On Raised Face flange for small-bore industrial piping connections.

Technical Details

- Size: 1 inch
- Material: SA-182 F316
- Standard: ASME B16.5
- Pressure Class: 150
- Type: SORF

APPLICATION

Industrial piping • Process systems • Chemical & petrochemical service • General engineering applications

Note: Product images are representative catalog-style visuals. Final dimensions, tolerances, inspection and certification are as per the purchase specification and applicable standards.

4 INCH SS 316 PIPE

Pipe SA-312 TP316, 4", Sch 80S, 6m

Product Description

Austenitic stainless-steel pipe supplied in the specified schedule and 6 m length.

Technical Details

- Size: 4 inch
- Material: SA-312 TP316
- Schedule: 80S
- Length: 6 m
- Product: Stainless Steel Pipe

APPLICATION

Industrial piping • Process systems • Chemical & petrochemical service • General engineering applications

Note: Product images are representative catalog-style visuals. Final dimensions, tolerances, inspection and certification are as per the purchase specification and applicable standards.

4 INCH SORF FLANGE

4 inch SA-182 F316, ASME B16.5, Class 150 SORF

Product Description

Slip-On Raised Face flange for industrial piping connections.

Technical Details

- Size: 4 inch
- Material: SA-182 F316
- Standard: ASME B16.5
- Pressure Class: 150
- Type: SORF

APPLICATION

Industrial piping • Process systems • Chemical & petrochemical service • General engineering applications

Note: Product images are representative catalog-style visuals. Final dimensions, tolerances, inspection and certification are as per the purchase specification and applicable standards.
